 - ▶ **ERP & CRM Management:** ERP Administration, Tally ERP, SAP MM, CRM Support, User Adoption, UAT Coordination, Data Quality and Process Optimization.
 - ▶ **Reporting & Analytics:** Advanced Excel, MIS Reporting, KPI Tracking, Dashboard Development, Data Analysis, Power BI, Tableau, SQL Basics and Google Analytics.
 - ▶ **Automation & Productivity:** Workflow Automation, Google Apps Script, Process Standardization, AI Agents, LLM Integrations and Reporting Automation.
 - ▶ **Agile Delivery & Collaboration:** Agile/Scrum, Stakeholder Management, Cross-Functional Collaboration, User Training and Continuous Improvement.
 - ▶ **Digital Systems:** Google Workspace, WordPress, Wix, Digital Content Management and Collaboration Platforms.
-

PROFESSIONAL EXPERIENCE

Automation & Transformation Lead · FlightPath InfoGain Pvt. Ltd. · Karnal, India **April 2026 – Present**

- ▶ Saved 10+ days of manual processing time by designing and deploying an automated corporate gifting and rewards workflow integrating external banking and e-commerce platforms.
- ▶ Reduced overall manual effort across departments through targeted workflow automation, script integrations, and process standardization.
- ▶ Lead business transformation and process optimization initiatives across departments, designing solutions to eliminate manual effort and improve operational efficiency.
- ▶ Manage ERP and CRM platforms, ensuring process alignment, user adoption and reporting effectiveness.
- ▶ Develop dashboards, reports and analytics frameworks to support data-driven decision-making.
- ▶ Drive digital transformation initiatives including process mapping, solution design, testing, deployment and change management.

IT Manager / ERP Manager · Rhiti Talent Management Pvt. Ltd. / Rhiti Group · New Delhi **May 2016 – March 2026**

- ▶ Managed ERP operations, reporting governance and business systems administration across multiple business functions.
- ▶ Built Advanced Excel and Google Sheets MIS reports, dashboards and management review trackers that improved reporting visibility and reduced manual follow-up effort.
- ▶ Administered Google Workspace users, permissions and collaboration tools while supporting efficient cloud-based operations.
- ▶ Maintained WordPress and Wix websites, digital content updates and analytics reviews.
- ▶ Reduced record-management inaccuracies by approximately 15% and improved operational efficiency by converting recurring manual issues into SOPs, access controls, and cleaner reporting routines.

- Configured SAP MM organisational structures, purchasing processes, document types and account assignments.
- Supported procurement workflows, release strategies and process alignment activities.
- Coordinated with SD and FI/CO teams to support integrated business processes.
- Conducted user training, issue resolution and functional support activities.

Developed and supported a business-owner web portal using ASP.NET, C#, Java, HTML, SQL Server and XML. Performed development, testing, debugging, deployment support and maintenance activities.

KEY ACHIEVEMENTS & BUSINESS IMPACT

- **Process & Workflow Automation:** Reduced recurring manual effort by introducing standardized workflows, SOPs, automation routines and structured process controls across business operations.
- **Reporting & Dashboard Development:** Designed MIS dashboards, management review trackers and reporting frameworks that improved data visibility, monitoring and decision-making across departments.
- **ERP & CRM Optimization:** Improved system usability and reporting effectiveness by streamlining ERP (Tally/SAP) and CRM processes, supporting data quality, user adoption and business reporting requirements.
- **Cross-Functional Business Support:** Supported technical and non-technical users across multiple departments by translating business requirements into practical system solutions and process improvements.
